The new degree of comfort.™

Rheem *Classic*® *Series* Heat Pumps

RPQL- JAZ Series

Efficiencies up to 15.5 SEER/13 EER/10.00 HSPF
Nominal Sizes 1.5 to 5 Ton [5.28 to 17.6 kW]

"Proper sizing and installation of equipment is critical to achieve optimal performance. Ask your Contractor for details or visit www.energystar.gov."

- Attractive, louvered wrap around jacket protects coil from weather extremes and yard hazards. Top grille is steel reinforced for extra strength. Cabinet is powder painted for all weather protection.
- Four sided outdoor coil design allows compressor operation with access panel removed.
- Air is discharged upward away from bushes and shrubs. The discharge pattern of the top grille provides minimum air restriction, resulting in quiet fan operation.
- Combination Grille/Motor Mount secures the fan motor to the underside of the discharge grille.
- All controls are accessible by removing one service panel. Removable top grille provides access to the outdoor fan motor and outdoor coil.
- Compressor compartment offers additional protection from the elements and reduces operating noise.
- Single speed, 8-pole fan motor is designed for quieter, energy-saving operation.
- Non-cycling reversing valve and demand defrost.
- All models meet or exceed a 1000-hour salt spray test per ASTM B117 Standard Practice for Operating Salt Spray Testing Apparatus.

All controls and compressor are accessible for servicing by removal of the service panel.

Drawn Painted Base Pan.

Model Features

RPQL- Series Heat Pump Outdoor Unit

1. **Scroll compressor** is hermetically sealed and incorporates internal high temperature motor overload protection, and durable insulation on the motor windings. It is externally mounted on rubber grommets to reduce vibration and noise.
2. **Copper Tube/Aluminum Fin Coils**—Both indoor and outdoor coils.
3. **Strong, Attractive Cabinet**—Constructed of powder painted steel. Louvered design protects the coil from damage.
4. **Internal Check Valve**—Provides for more quiet refrigerant metering.
5. **Enhanced Compressor Protection**—Features an **enhanced defrost control, auto-reset high pressure control, and auto-reset low pressure control** to provide compressor protection under abnormally high head pressure conditions (outdoor fan failure, restriction, dirty coil, etc.) or abnormally low suction pressure conditions (restrictions, TEV failure, loss of charge, indoor blower failure, etc.) while eliminating nuisance tripping sometimes experienced with conventional control systems.
6. **Drawn Painted Base Pan**—For extra corrosion resistance and sound reduction.
7. **Demand Defrost Control**—Provides complete defrost when defrost is required.
8. **Non-Cycling Reversing Valve**—Eliminates discharge noises on each heating cycle.
9. **Hot Gas Muffler**—Reduces noise in heating cycle.
10. **Bi-Directional Filter Drier**—Standard on all models (shipped – not installed).
11. **Service valves** are standard on all models.
12. **Refrigerant Metering**—TEV accurately meter refrigerant into indoor and outdoor coils.
13. The **RPQL-** has a 10 year limited compressor warranty.
14. All refrigerant connections are on the exterior of the unit, located close to the ground for neat appearing installations.
15. Coil design permits compressor operation with the access panel removed.
16. Control box is fully accessible in the upper part of the cabinet, just under the access panel.
17. Power and control wiring are kept separate.
18. Every unit is factory charged and tested.

For detailed thermostat match-up information, see specification sheet form number T11-001.

Rheem Heat Pump System

For all season home comfort, performance and energy conservation, choose a Rheem Series Heat Pump and a RHSL, RHLL, or RHKL Series Air Handler.

More than a reverse cycle air conditioner, it's a specially designed combination Winter/Summer comfort system using a single indoor coil for heating and cooling.

To choose an Air Handler designed for use with the RPQL- Heat Pumps, refer to the Performance Data Tables and/or the air handler specification sheet.

Scroll® Compressor

The scroll compressor is the key to efficiency for this Rheem model. It's the latest in high-efficiency compressor technology. The advanced scroll compressor offers low noise and vibration characteristics and features tolerance to liquid refrigerant and system contamination. The scroll compressor also has low start torque, eliminating start problems in the field. And its unique design enables the RPQL- heat pumps to perform efficiently, quietly and dependably.
